<tr>
<td>10.00</td>
<td>000</td>
<td>X</td>
</tr>
</tbody>
</table>

Another way to solve the geometric problem is to find the geometric mean of the two numbers.

The geometric mean is calculated by taking the square root of the product of the two numbers. In this case, the geometric mean of 100 and 1200 is:

\[ \sqrt{100 \times 1200} = \sqrt{120000} = 346.41 \]

Table 1: The 1996 election in Rome

<table>
<thead>
<tr>
<th>Time</th>
<th>24 Jun: 20:00</th>
<th>1 Jun: 14:00</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total votes</td>
<td>6 094</td>
<td>4 946</td>
</tr>
<tr>
<td>Yes</td>
<td>2 694</td>
<td>2 694</td>
</tr>
<tr>
<td>No</td>
<td>3 394</td>
<td>2 252</td>
</tr>
</tbody>
</table>

According to the results of the two candidates from Zeta Party.

The geometric mean of the two numbers is the square root of the product of the two numbers.

\[ \sqrt{24.95 \times 26.83} = \sqrt{667.07} \approx 25.83 \]
different proposals being put forth in the political arena.

The name of the party's platform is listed in parentheses and

To maximize our democratic representation we need to

The role of parties in political representation.

In this chapter, we will explore the role of political representation in democratic societies. We will start by examining the role of political parties in democratic societies. Political parties play a crucial role in political representation. They are instrumental in bridging the gap between the electorate and the government. Political parties provide a platform for political debate and allow for the expression of diverse political views. They also help to ensure that the interests of the electorate are represented in the political process. Political parties are necessary for the functioning of democratic societies and their role in political representation cannot be overstated.

In my view, the political process is driven by the following factors:

1. Representation from elected leaders
2. Representation from political parties
3. Representation from citizens

In order to ensure effective political representation, it is important to consider the role of political parties in the political process.

References

For a detailed discussion of political representation, see Woods and Ormiston (2007).

Conclusion

In conclusion, political representation is a critical aspect of democratic societies. It is essential for ensuring that the interests of the electorate are represented in the political process. Political parties play a crucial role in political representation and their role cannot be overstated. It is important to ensure that the political process is driven by the principles of democracy and that political representation is effective and meaningful.
